

CLASSIC
NATURAL WOVEN PANELS

pilebyg

FROM THE FIELDS AND BARNS AT VILLERUP HOVEDGAARD

- ✓ We cultivate and process nature for panels applied in garden and park surroundings – and for buildings. Our panels are of a unique quality and finish.
- ✓ CLASSIC is woven in the barns at Villerup Hovedgaard - and the fence is made in a timeless Danish design that can not be compared with the flimsy willow fences you otherwise see.
- ✓ The panels can be supplied INCLUDING posts for foundation; where they are an integral part of the framework. It provides a tight and simple design - even after installation.
- ✓ Standard panels are delivered at a democratic price - and the opportunity to order in special sizes is always possible.

STRENGTH IS ESTABLISHED THROUGH DESIGN AND MATERIALS

- ✓ We weave in debarked, strong willow stems grown and harvested extensively on Villerup's fields.
- ✓ It is crucial for the life of the fence to weave in strong willow - and that the bark has been removed to create a healthier aging process - without the risk of rotting wood.
- ✓ Steel crossbeams ensure dimensional stability; furthermore, the steel is laid into the frame itself - not just drilled. It gives great strength.
- ✓ All willow is dried prior to weaving. This ensures a tight weave that does not dry up after weaving with the risk of becoming loose in the "frame".

NATURES OWN WISDOM GUIDES US

- ✓ Upon delivery, the fence is in fresh woody shades. The panels will turn silver grey and achieve a lovely patina together with the larch frame. A total of a beautiful, gray-gloss surface.
- ✓ During a transitional period, the stems can be "gray-spotted" - as the uniformity of the natural surface occurs over years.
- ✓ Raw nature ages with the grace of nature - and the fence is designed so that maintenance can be omitted.
- ✓ Planting at the foot of the fence extends the life of the fence. The stems are stretched out in a tight weave over galvanized steel, which provides the necessary dimensional stability.
- ✓ CLASSIC is a natural fence - the most beautiful aging is achieved in an interplay between fencing and planting. Think about biodiversity when you plant.

TRADITION & INNOVATION

- ✓ 5,500 tonnes of CO2 are stored annually in PileByg's plantations.
- ✓ 9 of the UN's 17 world goals are everyday and part of our work.
- ✓ Everything is produced in Denmark. Minimal use of chemicals in all operations.

- ✓ Tradition of good craftsmanship and innovation are one and the same.
- ✓ Chemistry and polluting maintenance are not necessary.
- ✓ None or minimal maintenance.
- ✓ The design ages with the grace of nature - as opposed to treated wood and plastic.

- ✓ 30 years of work with production and processing of willow at home and abroad;
- ✓ Delivery to state, municipality, industry and private.
- ✓ Awarded; among other things with the Danish Design Prize. We take pride in the fact that you can always call or email for help and advice.
